MANSI BHATEJA

DATA ANALYST | FRESHER

Dwarka Mor, New Delhi, India | 7009548578 | mansibhateja2@gmail.com | Portfolio: mansibhateja2.github.io

CAREER OBJECTIVE

Entry-level Data Analyst seeking to apply skills in Python, Power BI, MySQL, Microsoft Excel, statistics, and Generative AI to clean and analyze data, build dashboards, identify trends, and support data-driven business decisions.

CERTIFICATION

DATA ANALYTICS CERTIFICATE — DUCAT India, Vikaspuri Branch, New Delhi (Professional Training)

TECHNICAL SKILLS

- **Power BI:** Data modeling, relationships, DAX measures, KPI cards, dashboards and visualizations
- **MySQL:** SELECT, filtering, sorting, JOINs, GROUP BY and aggregate functions
- **Python:** Fundamentals, data handling, Pandas and NumPy (practice level)
- **Excel:** Data cleaning, formulas, PivotTables, charts, lookup functions and slicers
- **Statistics:** Mean, median, mode, variance, standard deviation, probability, correlation and trend analysis
- **Generative AI:** Prompt writing and AI-assisted productivity

ACADEMIC / PRACTICE PROJECTS

Supply Chain Analysis | Power BI

- Analyzed supply chain order data to track sales, order fulfillment, delivery performance, shipping delays, and late-delivery risk through interactive dashboards.

Maven Market Analysis | Power BI, DAX, Excel

- Practiced analyzing sales, product and store performance with interactive visuals, KPI summaries, and DAX measures.

Store Data Analysis | Power BI, Excel

- Analyzed store sales, product and category performance, and revenue trends; presented key metrics through an interactive dashboard.

Movie Rental Analysis | Power BI, MySQL

- Explored rental transactions, film and category performance, customer trends, and rental revenue using data modeling and dashboard visuals.

Power BI Sales Analysis with MySQL | Power BI, MySQL

- Practiced querying structured data with SQL and using the results in Power BI to create sales summaries, category comparisons, and KPI visuals.

Sales Management System | Python, MySQL, Excel

- Organized sales and customer records in a MySQL database, used Python to process records, and planned Excel reports and dashboard metrics.

Business Performance Dashboard | Power BI, DAX, Excel

- Built practice visuals for revenue, profit, product performance, and sales trends; explored relationships, report filters, and KPI-style summaries.

HR Analytics Dashboard | Power BI, Excel

- Practiced visualizing attrition, department distribution, average age, and salary metrics through charts and KPI visuals.

CORE COMPETENCIES

Analytical thinking • Problem-solving • Data cleaning and interpretation • Dashboard design • Attention to detail • Business reporting • Time management • Continuous learning

EDUCATION

Master of Commerce (M.Com) — Vardhman Mahaveer Open University, Kota, Rajasthan
